List of Departmental Electives

Departmental Elective – I

1	CE-506A	Air Pollution Control
2	CE-506B	Advance structure engineering
3	CE-506C	Construction Project Management
4	CE-506D	Advance Railway Engineering

Departmental Elective – II

1	CE-508A	Advance Water Supply & Wastewater Management
2	CE-508B	Advance Design of steel structures
3	CE-508C	Rehabilitation of Structures
4	CE-508D	Analysis & Structural Design of Pavement

Departmental Elective – III

1	CE-510A	Integrated Solid Waste Management
2	CE-510B	Bridge engineering
3	CE-510C	Construction Practice & Equipment
4	CE-510D	Highway Planning and Geometric Design

Open Elective

1	CE-603A	Remote Sensing & GIS Technology
2	CE-603B	Optimization Methods in Civil Engineering
3	CE-603C	Environmental Impact Assessment
4	CE-603D	Industrial Safety

Audit Course 1 & 2

1	AC-502A	English for Research Paper Writing
2	AC-502B	Disaster Management
3	AC-601A	Pedagogy Studies
4	AC-602B	Personality Development through Life Enlightenment Skills

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 1st Sem

L- T -P

CE 501:-Project Planning and Control

3- 0 -0

Unit-I

Project Planning: Introduction to Project Planning Process. Types of Project Plans-Project feasibility plan, Project preliminary plan, Project Construction plan. Introduction to network techniques– CPM, PERT and Precedence network

Unit-II

Statistical concepts, Material management purchases management and inventory control, Man-Material-Machinery-Money optimization, scheduling, monitoring, updating.

Unit-III

Cost functions, time-cost trade off, resource planning-levelling and allocation. line of balancing techniques, application of digital computers ABC analysis.

Unit-IV

Project Quality Management - Quality planning, Quality assurance, and Quality control; Project Risk Management - Risk identification, Risk quantification, Risk response development and control

Unit-V

Resource Planning: Planning construction Manpower, Scheduling Construction site workers. Planning Construction Materials, Materials quantity estimation. Constrained and unconstrained resource scheduling. Resource usage profile, Resource smoothing, Resource leveling

Text Books:

1) Chitkara.K.K. Construction Project Management: Planning Scheduling and Control Tata McGraw Hill Publishing Company, New Delhi-2018

Reference Books:

- 1) Jha, K N., Construction Project Management, First Edition, Pearson Publishers, 2011.
- 2) Calin M. Popescu, ChotchalCharoemgam, Project Planning, Scheduling and Control in Construction: An Encyclopaedia of terms and Applications, Wiley, New York,
- 3) Chits Hendrickson and Tung Au, Project Management for Construction - **Fundamental** Concepts for Owners, Engineers, Architects and Builders, Prentice Hall Pittsburgh, 2000

Latest Journals: [htQ://ijirt.org/Article?manuscript=146359](https://ijirt.org/Article?manuscript=146359)

Latest Things: <https://onlinecourses.nptel.ac.in/noc19ce30/preview>

Unit-I

Introduction to quality, Planning and control of quality during design of structures. Quantitative techniques in quality control. Quality assurance during construction

Unit-II

Inspection of materials and machinery. In process inspection and test. Preparation of quality manuals, check-list and inspection report. Establishing quality assurance system. Factors affecting safety: Physiological, Psychological and Technological.

Unit-III

Quality standards/codes in design and construction. Concept and philosophy of total quality management (TQM). Training in quality and quality management systems (ISO-9000). Concept of safety.

Unit-IV

Planning for safety provisions. Structural safety. Safety consideration during construction, demolition and during use of equipment. Management of accidents/injuries and provision of first aid.

Unit-V

Provisional aspect of safety. Site management with regard to safety recommendations. Training for safety awareness and implementation. Formulation of safety manuals. Safety legislation, standards/codes with regard to construction, Quality vs. Safety, Case Studies,

Latest Things: <https://www.clockshark.com/Blog/10-steps-to-ensure-quality-on-your-construction-project>

Unit-I

Cement: Hydration of cement, Chemical reaction, Structure of cement paste, Consistency and setting. Lime and supplementary cementations materials. Aggregates: Classification of aggregates according to size and shape. Fineness modulus of aggregates, grading of aggregates, properties of aggregates,

Unit-II

Properties of Concrete: Properties of Concrete in plastic stage - Workability, test on workability, factor affecting workability, segregation and bleeding. Properties of Hardened Concrete - Strength toughness, hardness durability, impermeability and dimensional changes.

Unit-III

Batching, mixing and transportation of concrete: Batching of cement. batching of aggregate by volume by using proper gauge box selection of proper gauge box. Batching by weight: spring balance and by batching machines. Measurement of water. Mixing: hand mixing and machine mixing, types of mixer, capacity of mixers, choosing appropriate size mixer operation of mixer. Transportation with and situation of use of the following - pan, wheel borrows, truck mixer, chutes, belt conveyors, pump tower crane and hoist etc.

Unit-IV

Special Purpose Concrete: introduction to ready mix concrete, high strength concrete, light weight concrete, fiber reinforced concrete, fiber cement and its uses. Admixture - acceleration, air entraining agent, water reducing and set controlling agents.

Unit-V

Test on Hardened Concrete: Effect of end condition of specimen, capping, H/D ratio, rate of loading, moisture condition. Compression, tension and flexure tests. Tests on composition of hardened concrete-cement content, original w/c ratio

Ethical Things: <http://civilengineeringpdf.com/civil-engineering-materials-pdf/>

Latest Things: <https://www.pdfdrive.com/civil-engineering-materials-books.html>

Unit-I

Integration in series, ordinary and singular points, power series, Frobenius method to find the general solution of higher order linear ordinary differential equation with constant variable coefficients, Legendre and Bessel's equation, Legendre polynomials, Bessel functions, Boundary value, Sturm-Liouville problem, Orthogonal eigen function expansions.

Unit-II

Laplace Transform, Laplace Inverse Transform, Application of Laplace Transform and Inverse Laplace Transform in the particular solution of integral equation and integro-differential equations, Infinite Fourier sine and cosine transforms and its applications, Fourier-Legendre series, Fourier-Bessel series.

Unit-III

Interpolation, Extrapolation, Lagrange's method, Missing-terms problems, Hermite interpolation, Spline interpolation, Cubic spline, Fitting of a curve in given sub-interval using cubic spline interpolation, Representation of a tabulated function in power of $(x-a)$ using Newton's divided difference formula.

Numerical integration using Romberg method, Gauss-Legendre and Lobatto methods, Gaussian integration and numerical; double integration, Numerical solution of a system of non-linear equations using Newton Raphson method, Solution of system of linear equations in four variables using Gauss-Jordan and Crout's methods.

Unit-V

Partial Differential Equations, Modeling, Vibrating String, Wave Equations. Product solutions of Laplace equations, heat conduction equations, wave equations, Poisson's equations by the method of separation of variables and its applications in boundary value problems, Conversion of a differential equation into integral equation and vice versa, Solutions of Fredholm and Volterra integral equations of first and second kind

Text Books:

Latest Things: <https://www.wolfram.com/books/profile.cgi?1d=8784>

Unit-I

Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem. Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations

Unit-U

Effective literature studies approaches, analysis Plagiarism, Research ethics,

Unit-III

Effective technical writing, how to write report, Paper Developing a Research Proposal, Format of research proposal, a presentation and assessment by a review committee

Unit-IV

Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.

Unit-V

Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications.

Unit-VI

New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs.

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem

Course Code	Subject Name	L-T-P	Cr.
CE-502	Advance Soil Mechanics	3-1-0	4

Unit 1

Effective stress, pore pressure, hydraulic conductivity and its directional variation, electro osmosis

Seepage behavior of soil-flownet constructions by various technique, seepage in layered soils, filter design, seepage through dam body

Unit 2

Consolidation: one-dimensional and generalized consolidation theories, primary and secondary consolidation, determination of C_v by various methods, visco- elastic models, sand drains, effect of smear, numerical solutions, consolidation settlements.

Unit 3

Shear behavior of soils, pore pressure parameters, UU,CU& CD tests, stress path method for settlement analysis. Total & effective stress- path, water content contours, stress history, anisotropy of strength, thixotropy, creep, determination of in situ undrained shear strength, stress-strain characteristics of soils, determination of modulus values

Unit 4

Earth Pressure: Rankine and Coulomb theories, active, passive and pressure at rest; concentrated surcharge above the back fill, earth pressure due to uniform surcharge, earth pressure of stratified backfills, saturated and partially saturated backfill.

Unit 5

Retaining walls:Proportioning of retaining walls, stability of retaining walls, mechanically stabilized retaining walls/reinforced earth retaining walls

Sheet Pile wall: free earth system, fixed earth system

Bulkheads: bulkheads with free and fixed earth supports, equivalent beam method, Anchorage of bulkheads and resistance of anchor walls, spacing between bulkheads and anchor walls, resistance of anchor plates

Books

- Harr, M.E. Foundation of Theoretical soil Mechanics.
- Lambe & Whitman " Soil Mechanics"
- Scott, R.F. Principles of Soil Mechanics.

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem

Course Code	Subject Name	L-T-P	Cr.
CE-504	Construction and Maintenance Management	3-1-0	4

1. ENGINEERING ECONOMY: Principle of Engineering Economy, Minimum cost point analysis, Breakeven point analysis, Depreciation and depletion.

2. SAFETY IN CONSTRUCTION: Causes, classification, cost and measurement of an accident, safety programme for construction, protective equipment, accident report, safety measure: (a) For storage and handling of building materials. (b) Construction of elements of a building (c) In demolition of buildings Safety lacuna in Indian scenario.

3. Construction Planning: Need of construction planning, Constructional Resources, construction team, stages in construction, preparation of construction schedule, Job layout, inspection and quality control.

4. GENERAL MANAGEMENT: Introduction and characteristics of management, Principle and function of management, Scientific management.

5. Materials Management: Scope, Objective and functions of material management, Procurement and store management, Materials handling management, Inventory control and management. Disposal of Surplus Materials

6. Earth Moving Equipment Crawler and wheel tractors their functions, types and specifications; Grabbability Bull dozers and their use; tractor pulled scrapers, their sizes and output; effect of grade and rolling resistance on the output of tractor pulled scrapers Earth loaders; Placing and compacting earth fills. Power shovels-functions, selection, sizes, shovel dimension and clearances, output, Draglines-functions, types sizes, output clamshells; Safe lifting capacities and working ranges cranes; Hoes, Trenching machine types and production rate calculation of producing rates of equipment ; examples. Hauling Equipment : Trucks; Bottom dump wagons; capacities of trucks and wagons Balancing the capacities of hauling units with the size excavator; effect of grade, rolling resistance and altitude on the cost/performance of hauling equipment; balancing excavating hauling equipment examples. 8. Drilling, Blasting and Tunneling Equipment : Definition of terms, bits, Jackhammers, Drifters, wagon drills, core drills, piston drills, blast hole drills, shot drills, diamond drills, tunneling equipment, selecting the drilling method equipment; selecting drilling pattern; Rates for drilling rock, compressors. Pile Driving Equipment : Pile hammers, selecting a pile hammer, loss of energy due to impact, Energy losses due to causes other than impact.

Books

1. Construction equipment and its planning and application Dr. Mahesh Verma.
2. Construction Planning equipment and Methods by RL Peuripo Tata McGraw Hill.
3. Heavy construction planning equipment and methods -Jagman Singh Oxford and

1st Year/ 2nd Sem

Course Code	Subject Name	L-T-P	Cr.
CE-522	Advance Soil Mechanics Lab	0-0-2	2

List of Practicals:

1. Standard and modified proctor compaction test.
2. Atterberg's Limits (Liquid Limit, Plastic limit, Shrinkage limit)
3. Unconfined compression test.
4. Direct shear test.
5. Falling head permeability test and Constant head permeability test.
6. Tri-axial compression test – UU, CU, CD tests.
7. Consolidation test.

Department of Civil Engineering
M.Tech Scheme & Syallabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -I

Course Code	Subject Name	L-T-P	Cr.
CE-506A	Air Pollution and Control	3-1-0	4

Unit I

Introduction: Role and scope of air pollution control engineering, Principles of fluid flow, Boundary layer theory, Energy transfer in fluid flow, Fluid flow measurement, Dynamics of particles in fluid, Properties of particles, Collection efficiencies of particles, Source reduction (Fuel substitution, Fuel pretreatment, Process modifications), Emission standards.

Unit II

Design of Industrial Ventilation Systems: Component of Ventilation systems, Air pollution control systems, Hood specifications and design, Duct specifications and design, Blowers, stacks.

Unit III

Particulate Emission Control: Stoke's law, Basic principles, Design and operation of settling chambers (Both laminar and turbulent flow), Cyclone and multiclones, Scrubbers, Bag houses and Electrostatic precipitators, Collection efficiency and Pressure drop calculations across air pollution control devices.

Unit IV

Gaseous Emissions Control: Basic principles, Design and operation of scrubbers for gaseous pollutant removal, Adsorption columns and condensation devices.

Unit V

Control of Mobile Sources: Control of crank case emissions, Evaporative emissions control, Air fuel ratio, Alternative fuels, Automobile emission control, Catalytic convertors, Gasoline and diesel powered vehicles. Air Pollution Mitigation Measures: Green belt design, Management strategies for air pollution abatement

Recommended Books

1. Flagan RC and Seinfeld JH, Fundamentals of Air Pollution Engineering, Prentice Hall (1988).
2. Boubel RW, Fox DL, Turner B and Stern AC, Fundamental of Air Pollution, Academic Press (1994). 3rd ed.
3. Perkins HC, Air Pollution, McGraw Hill (2004).
4. Rao CS, Environmental Pollution Control Engineering, New Age International (2006).

Department of Civil Engineering
M.Tech Scheme & Syallabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -I

Course Code	Subject Name	L-T-P	Cr.
CE-506B	Advanced Structural Engineering	3-1-0	4

Matrix Algebra – methods for matrix inversion and solution of simultaneous equations – band and sparse matrix techniques stiffness and flexibility matrices of structural elements – various co-ordinate system and their transformation and synthesis matrix formulation of force and displacement methods – member approach. Finite element concept in Engineering Analysis – Displacement model shape functions and element properties. Analysis of plane stress/strain – axi-symmetric stress analysis. Weighted residual methods and variational formulation of Finite Element Analysis. Isoparametric element — Numerical integration – assemblage of elements. Solution techniques – Finite element programming – use of package programmes.

REFERENCE BOOK:

- 1) Numerical Methods for Engineers by Chopra
- 2) Finite element procedure-- K.J.Bathe
- 3) matrix analysis of frame structure-- wever/gere
- 4) Structural analysis – A matrix approach by G.S.Pandit and Gupta
- 5) Numerical Methods for Engineers by Steven C. Chapra, Raymond P. Canale

Department of Civil Engineering
M.Tech Scheme & Syallabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -I

Course Code	Subject Name	L-T-P	Cr.
CE-506C	Construction Project Management	3-1-0	4

Unit I

Project Management: Basic forms of organization with emphasis on Project; Project life cycle, planning for achieving time, cost, quality, project feasibility reports based on socio-techno-economic-environmental impact analysis, project clearance procedures and necessary documentation for major works like dams, multi-storeyed structures, ports, tunnels, Qualities, role and responsibilities of project Manager, Role of Project Management Consultants, Web based project management.

Unit II

Project Scheduling: Construction Scheduling, Work break down structure, activity cost and time estimation in CPM, PERT, techniques, Precedence Network Analysis.

Unit III

Project Controlling: Monitoring and Control, Crashing, Resource Levelling, Updating. Work Study: Definition, Objectives, and basic procedure, and method study and work measurement.

Unit IV

Work-study applications in Civil Engineering. Method study – Definition, Objective, Procedure for selecting the work, recording facts, symbols, flow process charts, multiple activity charts, string diagrams.

Unit V

Work measurement – Time and motion studies, Concept of standard time and various allowances, time study, equipment performance rating.

Suggested Readings;

- 1 Construction Planning & management By P S Gahlot & B M Dhir, New Age International Limited Publishers
2. Construction Project planning & Scheduling By Charles Patrick, Pearson, 2012
- 3 Construction Project Management Theory & practice --- Kumar Neeraj Jha, Pearson, 2012
4. Construction management Fundamentals by Knutson, Schexnayder, Fiori, Mayo, Tata McGraw Hill, 2nd Edition.

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -I

Course Code	Subject Name	L-T-P	Cr.
CE-506D	Advanced Railway Engineering	3-1-0	4

Unit I. Railway Transportation and its development, Long-term operative plans for Indian Railways. Classification of Railway lines and their track standards, Railway terminology, Traction and tractive

Unit II. Resistance, Hauling capacity and tractive effort of locomotives, different Types of Tractions.

Unit III. Permanent Way: Alignment Surveys, Requirement, gauges, track section, Coning of wheels, Stresses in railway track, high-speed track. Geometric design of railway track, Gauge, Gradient, speed, super elevation, cant deficiency, Negative super elevation, curves, length of transition curves, grade compensations.

Unit IV. Railway track components: Important features, Railway curves, Super elevation, Gradients and grade compensation, Points and crossing and their design approaches. ; Construction and maintenance of railway track, Control of train movements; Signals and interlocking,

Unit V. Modernisation of railways and future trends; Track standards and track rehabilitation.

Suggested Readings:

1. J.S. Mundrey, Railway Track Engineering, Tata McGraw Hill Co. Ltd., 3rd Edition, 2000.
 2. M.M. Agarwal, Railway Track Engineering, Standard Publishers, 1st Ed. 2005.
- Supplementary Reading: 1. S. Chandra and Aqarwal, Railway Engineering, Oxford University Press, 1st Ed. Feb 2008. 2. A.D. Kerr, Fundamentals of Railway Track Engineering, Simmons Boardman Pub Co (December 30, 2003).

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -II

Course Code	Subject Name	L-T-P	Cr.
CE-508A	Advance Water Supply and Waste Water Management	3-0-0	3

1. Wastewater Characteristics and Effluent Standards: Physical, chemical and biological parameters of water pollution; Solids (volatile and non-volatile solids; suspended, dissolved and colloidal solids); Biodegradable and non-biodegradable organic matter (DO, COD, BOD and BOD kinetics); Nutrients (TKN, total nitrogen, and total and ortho-phosphorus); Sulfides, phenols, cyanides, heavy metals and recalcitrant/toxic organic compounds; Effluent standards.

2. Overview of Wastewater Treatment Technologies: Preliminary, primary, secondary and tertiary treatment technologies; Overview of biological treatment technologies; Biological treatment technologies for the tertiary treatment.

3. Preliminary Treatment: Screens; Grit removal facilities – grit channels, vortex degritters and cyclonic degritters, aerated grit chambers; Effluent sumps and pumps; Equalization tanks – flow and strength equalization, and online and offline equalization tanks.

4. Primary Treatment: Neutralization and precipitation; Primary and secondary sedimentation tanks; Membrane filtration processes; Roughing filters.

5. Biological Treatment: Activated sludge process and its modifications including SBR; Trickling filters and RBC units; SAF, FAB and MBBR technologies; UASB reactors and its modifications including anaerobic baffled reactor and anaerobic moving bed reactor; Waste stabilization pond systems and its modifications including vegetated ponds and constructed wetlands. **Other Treatment Technologies:** Advanced oxidation processes; Biological nutrient removal; Filtration and chlorination; Membrane processes for TDS reduction; Wet oxidation process.

1st Year/ 2nd Sem
Departmental Elective -II

Course Code	Subject Name	L-T-P	Cr.
CE-508B	Advance Design of Steel Structure	3-0-0	3

Unit I Properties of Steel: Mechanical Properties, Hysteresis, Ductility. Compactness and noncompactness, slenderness, residual stresses. 07

Unit II Plastic Behavior of Structural Steel: Introduction, Plastic theory, Plastic hinge concept, Plastic collapse load, conditions of plastic analysis, Theorem of Plastic collapse, Methods of Plastic analysis 10

Unit III Design of Industrial Buildings: 15 Introduction, selection of bay width, structural framing, purlins, girts and eave strut, plane trusses, Design of Gantry girders.

Unit IV Design of cold formed sections: Advantages, stiffened and un stiffened elements, local buckling and post buckling strength, shear lag and flange curling, unusually wide flange section, short span sections, members subjected to axial tension, compression and bending.

M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -II

Course Code	Subject Name	L-T-P	Cr.
CE-508C	Rehabilitation of Structures	3-0-0	3

UNIT-I Introduction Maintenance, rehabilitation, repair, retrofit and strengthening, need for rehabilitation of structures. Cracks in R.C. buildings Various cracks in R.C. buildings, causes and effects Maintenance importance of maintenance, routine and preventive maintenance. Damages to masonry structures Various damages to masonry structures and causes

UNIT-II Repair materials Various repair materials, Criteria for material selection, Methodology of selection, Health and safety precautions for handling and applications of repair materials Special mortars and concretes Polymer Concrete and Mortar, Quick setting compounds Grouting materials Gas forming grouts, Salfoalumate grouts, Polymer grouts, Acrylate and Urethane grouts. Bonding agents Latex emulsions, Epoxy bonding agents. Protective coatings Protective coatings for Concrete and Steel FRP sheets

UNIT-III Damage diagnosis and assessment Visual inspection, Non Destructive Testing using Rebound hammer, Ultra sonic pulse velocity, Semi destructive testing, Probe test, Pull out test, Chloride penetration test, Carbonation, Carbonation depth testing, Corrosion activity measurement Substrate preparation Importance of substrate/surface preparation, General surface preparation methods and procedure, Reinforcing steel cleaning

UNIT-IV Crack repair Various methods of crack repair, Grouting, Routing and sealing, Stitching, Dry packing, Autogenous healing, Overlays, Repair to active cracks, Repair to dormant cracks. Corrosion of embedded steel in concrete Corrosion of embedded steel in concrete, Mechanism, Stages of corrosion damage, Repair of various corrosion damaged of structural elements (slab, beam and columns) Jacketing Jacketing, Column jacketing, Beam jacketing, Beam Column joint jacketing, Reinforced concrete jacketing, Steel jacketing, FRP jacketing. Strengthening Strengthening, Beam shear strengthening, Flexural strengthening.

M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -II

Course Code	Subject Name	L-T-P	Cr.
CE-508D	Analysis & Structural Design of Pavement	3-0-0	3

Unit I: General Consideration: Components of road pavement such as subgrade, Sub base, Base course and wearing course and their functions. Comparison of flexible and rigid pavements highway and airport pavements

Unit II. Pavements Materials: Stabilizing base viz., Mechanical, Stabilized with admixture like cements, Bitumen lime and other chemicals. Factor Affecting the Pavements Design: Traffic factor, Moisture and climate factors, and Soil factor, Stress distribution factor Design of Flexible pavements:

Unit III. General classification of various methods and their approach, Empirical methods using soil classification. Theoretical and semi theoretical methods. General observation and limitation of various methods.

Unit IV. Design Method of Rigid Pavements: Analysis of stresses in concrete pavements due to various wheel loads. Cyclic changes in temperature. Changes in moisture and volumetric change in subgrade and base course. Comparison of analysis of stress due to wheel loads on liquid and solids subgrade theorem. Thickness design methods such as P.C. A. design method F.A.A. methods etc. Design of distributed steel reinforcement, design of dowels, Design of spacing of joints.

Unit V. Pavement Evaluation and Strengthening: Method of pavement evaluation including LCN method for airport, Design of various types of overlays for flexible and rigid pavements, Mechanics of pumping and blowing, Factor affecting pumping, preventive measures. Pavements Performance: Pavements performance, Road Mechanic and their applications, The AASHO road test. Evaluation of performance of the flexible and rigid pavements. Analysis of results from flexible and rigid pavements.

1st Year/ 2nd Sem
Departmental Elective -III

Course Code	Subject Name	L-T-P	Cr.
CE-510A	Integrated Solid Waste Management	3-0-0	3

Unit - I Introduction to Environment Ecosystem –meaning- Types -Components- Structure – Functions, Levels of organization in nature- Food chain and Trophic structure, Biogeochemical Cycles, Energy flow.

Unit - II Municipal solid waste Definition - Sources and types of solid waste- composition and its determinants of Solid waste-factors influencing generation-quantity assessment of solid wastes-methods of sampling and characterization.

Unit - III Collection and Transfer Collection: Collection of Solid waste – collection services – collection system, equipments – time and frequency of collection – labour requirement – factors affecting collection – analysis of collection system – collection routes – preparation of master schedules. Transfer and Transport: Need for transfer operation – transfer stations – types – transport means and methods – location of transport stations - Manpower requirement – collection routes: Transfer stations – selection of location, types & design requirements, operation & maintenance.

Unit - IV Processing Techniques and Recovery of Energy Processing techniques – purposes mechanical volume reduction – necessary equipments – chemical volume reduction – incinerators – mechanical size reduction selection of equipments – components separation – methods – drying and dewatering.

Unit - V Disposal of Solid Wastes Refuse disposal – various methods – incinerations – principle features of an incinerator – site selection and plant layout of an incinerator - sanitary landfill- methods of operation – advantages and disadvantages of sanitary land fill - site selection – reactions accruing in completed landfills – gas and leachate movement and control – equipments necessary.

M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -III

Course Code	Subject Name	L-T-P	Cr.
CE-510B	Bridge Engineering	3-0-0	3

UNIT - I

Types of Bridges: Consideration of loads and stresses in bridges, bridge loading as per IRC and IRS specifications, traffic lanes, footway, kerbs, railing and parapet loading, impact, wind load, longitudinal forces, temp effects, secondary stresses, erection stresses, earth pressure, effect of live load on back fill and on the abutment.

UNIT – II

Design of RC Bridges: Slab culvert, box culvert, pipe culvert, T-beam bridge, super structure, design examples, brief introduction to rigid frame, arch and bow string girder bridges. Design of pre-stressed concrete bridges, pre-tensioned and post tensioned concrete bridges, analysis and design of multi-lane prestressed concrete T-beam bridge super structure.

UNIT – III

Steel Bridges: Types, economical span, loads, permissible stresses, fluctuation of stresses, secondary stresses, plate girder bridges, general arrangement, bridge floors, plate girder railway bridges, deck type plate girder bridges, design example. Truss bridges, types, wind force on lattice Girder Bridge, bracings, truss bridge for railway – through type truss bridge. Pier, abutment and wing walls, types of piers, forces on piers, stability, abutments, bridge code provisions for abutments, wing walls, design examples.

UNIT – IV

Bearings: Functions, bearings for steel and concrete bridges, bearings for continuous span bridges, IRC provisions for bearings, fixed bearings, expansion bearings, materials and specifications, permissible stresses, design considerations for rocker and roller cum rocker bearings, sliding bearings.

UNIT- V

Foundations, types, general design criterion, design of well and pile foundations for piers and Abutments.

Suggested Readings:

- (ii) Rowe RE, Concrete ridge Design

Department of Civil Engineering
M.Tech Scheme & Syllabus Batch 2021-2023
1st Year/ 2nd Sem
Departmental Elective -III

Course Code	Subject Name	L-T-P	Cr.
CE-510C	Construction Practice and Equipment	3-0-0	3

Unit I

Specifications, details and sequence of activities and construction co-ordination – Site Clearance – Marking – Earthwork - masonry – stone masonry – concrete hollow block masonry – flooring – damp proof courses – construction joints – movement and expansion joints – pre cast pavements – Building foundations – basements – temporary shed – centering and shuttering sheet piles – slip forms – scaffoldings – de-shuttering forms – Fabrication and erection of steel trusses – frames – braced domes – laying brick – weather and water proof – roof finishes – air conditioning – acoustic and fire protection.

Unit II

Techniques of Box jacking – Pipe Jacking -under water construction of diaphragm walls and basement-Tunneling techniques – Piling techniques- driving well and caisson - sinking cofferdam - cable anchoring and grouting-driving diaphragm walls, sheet piles - shoring for deep cutting- Large reservoir construction with membranes and Earth system- well points -Dewatering and stand by Plant equipment for underground open excavation.

Unit III

Launching girders, bridge decks, off shore platforms – special forms for shells - techniques for heavy decks – in-situ pre-stressing in high rise structures, aerial transporting handling - erecting light weight components on tall structures -erection of transmission towers - Construction sequences in cooling towers, silos, chimney, sky scrapers, bow string bridges, cable stayed bridges -Support structure for heavy Equipment and conveyors - Erection of articulated structures, braced domes and space decks.

Unit IV

Study on causes of building damage and deterioration – Assessment of materials and methods of repair and restoration.

Unit V

Selection of equipment for earth work - earth moving operations - types of earthwork equipment - tractors, motor graders, scrapers, front end loaders, earth movers – Equipment for foundation and pile driving. Equipment for compaction, batching and mixing and concreting - Equipment for material handling and erection of structures - Equipment for dredging, trenching, tunneling, drilling, blasting — dewatering and pumping equipment – Transporters.

Departmental Elective -III

Course Code	Subject Name	L-T-P	Cr.
CE-510D	Highway Planning & Geometric Design	3-0-0	3

UNIT –I

Planning: Description of urban and regional transportation systems, Definition of a system; System analysis: scope and limitations, Transportation planning based upon system Analysis, Survey and analysis of existing conditions.

Highway Alignment: Requirements. Factors controlling alignment. Obligatory points. Engineering Surveys for highway location. Route selection. Steps in new project. Highway classifications.

UNIT –II

Cross Sectional Element: Pavement surface characteristics. Factors affecting skid resistance.

Pavement unevenness. Camber. Providing camber in the field. Width of carriageway. Design Vehicle, Medians, kerbs, road margins, right of way and typical cross-sections of roads.

UNIT -III

Sight Distances: Introduction. Stopping sight distance. Reaction time. Analysis of stopping distance. Overtaking sight distance. Analysis of overtaking sight distance. Effect of grade on sight distances. Overtaking zone. Intermediate sight distance. Sight distance at intersections.

Super elevation: Requirement of super elevation. Limits and attainment of super elevation in the field.

UNIT –IV

Highway Alignment: General. Design speed. Horizontal curves. Super elevation. Analysis of super elevation. Super elevation design. Attainment of super elevation. Widening of pavement on horizontal curves. Methods of introducing extra widening. Horizontal Transition curves. Different types of transition curves. Length of transition curve. Setting out of transition curve. Set-back distance on horizontal curves. Curve resistance.

UNIT –V

Vertical Alignment: General. Gradients. Compensation in gradient on horizontal curves. Vertical curves. Summit curve. Length of summit curve. Valley Curve. Length of valley curve and profile. Relevant IRC standards for urban and rural roads.

Unit I

Introduction to Optimization: Engineering application of Optimization – Statement of an Optimization problem – Optimal Problem formulation – Classification of Optimization problem. Optimum design concepts: Definition of Global and Local optima – Optimality criteria – Review of basic calculus concepts – Global optimality

Unit II

Linear programming methods for optimum design: Review of Linear programming methods for optimum design – Post optimality analysis – Application of LPP models in design and manufacturing.

Unit III

Optimization algorithms for solving unconstrained optimization problems – Gradient based method: Cauchy's steepest descent method, Newton's method, Conjugate gradient method.

Unit IV

Optimization algorithms for solving constrained optimization problems – direct methods – penalty function methods – steepest descent method – Engineering applications of constrained and unconstrained algorithms.

Unit V

Modern methods of Optimization: Genetic Algorithms – Simulated Annealing – Ant colony optimization – Tabu search – Neural-Network based Optimization – Fuzzy optimization techniques – Applications. Use of Matlab to solve optimization problems.

Course Code	Subject Name	L-T-P	Cr.
CE-603C	Environment Impact Assessment	3-0-0	3

UNIT-1

Introduction: The Need for EIA, Indian Policies Requiring EIA , The EIA Cycle and Procedures, Screening, Scoping, Baseline Data, Impact Prediction, Assessment of Alternatives, Delineation of Mitigation Measure and EIA Report, Public Hearing, Decision Making, Monitoring the Clearance Conditions, Components of EIA, Roles in the EIA Process. Government of India Ministry of Environment and Forest Notification (2000), List of projects requiring Environmental clearance, Application form, Composition of Expert Committee, Ecological sensitive places, International agreements.

UNIT-II

Identifying The Key Issues: Key Elements of an Initial Project Description and Scoping, Project Location(s), Land Use Impacts, Consideration of Alternatives, Process selection: Construction Phase, Input Requirements, Wastes and Emissions, Air Emissions, Liquid Effluents, Solid Wastes, Risks to Environment and Human, Health, Socio-Economic Impacts, Ecological Impacts, Global Environmental Issues.

UNIT-III

EIA Methodologies: Criteria for the selection of EIA methodology, impact identification, impact measurement, impact interpretation & Evaluation, impact communication, Methods-Adhoc methods, Checklists methods, Matrices methods, Networks methods, Overlays methods, Environmental index using factor analysis, Cost/benefit analysis, Predictive or Simulation methods. Rapid assessment of Pollution sources method, predictive models for impact assessment, Applications for RS and GIS.

UNIT-IV

Reviewing The EIA Report: Scope, Baseline Conditions, Site and Process alternatives, Public hearing. Construction Stage Impacts, Project Resource Requirements and Related Impacts, Prediction of Environmental Media Quality,

UNIT-V

Socio-economic Impacts, Ecological Impacts, Occupational Health Impact, Major Hazard/ Risk Assessment, Impact on Transport System, Integrated Impact

Books
