

# Lingaya's Vidyapeeth

Deemed-to-be-University u/s 3 of UGC Act 1956, Government of India

**NAAC ACCREDITED**

Approved by MHRD / AICTE / PCI / BCI / COA / NCTE

Nachauli, Jasana Road, Faridabad- 121002 (Haryana)

Website: [www.lingayasvidyapeeth.edu.in](http://www.lingayasvidyapeeth.edu.in) | Ph: 0129-2598200-05

## COURSE PLAN & COURSE DATA SHEET

|  |   |
|--|---|
| PROGRAM: MCA                               | DEGREE: PG                                |
| COURSE: Artificial Intelligence & Robotics | SEMESTER: VI CREDITS: 3                   |
| COURSE CODE: MCA-128<br>REGULATION: NA     | COURSE TYPE: CORE                         |
| COURSE AREA/DOMAIN: IT                     | CONTACT HOURS: 3+1 (Tutorial) hours/Week. |
| CORRESPONDING LAB COURSE CODE (IF ANY): NA | LAB COURSE NAME (IF ANY): NA              |

### PROGRAM EDUCATIONAL OBJECTIVES:

- Graduates will have a strong foundation in AI and robotics technologies, enabling them to design, implement, and deploy intelligent systems.
- Graduates will demonstrate the ability to apply AI and robotics concepts to solve complex, real-world problems effectively.
- Graduates will be innovative thinkers capable of developing novel AI and robotics solutions to address emerging challenges.
- Graduates will possess interdisciplinary knowledge, allowing them to collaborate across various domains and industries.
- Graduates will understand the ethical implications of AI and robotics and apply responsible practices in their work.
- Graduates will have the motivation and skills to engage in lifelong learning to keep pace with evolving AI and robotics technologies.
- Graduates will be prepared to contribute to AI and robotics research, development, and innovation.
- Graduates will communicate technical ideas effectively to both technical and non-technical stakeholders.
- Graduates will demonstrate leadership skills and work effectively as part of multidisciplinary teams.
- Graduates will adapt to changing technological landscapes and emerging trends in AI and robotics.
- Entrepreneurship: Graduates will have the entrepreneurial mindset and skills to create AI and robotics startups and contribute to the industry's growth.
- Graduates will appreciate the global impact of AI and robotics and consider societal, economic, and cultural factors in their work.

### SYLLABUS:

| UNIT | DETAILS  | HOURS |
|------|--|-------|
| I    | <b>INTRODUCTION TO AI AND SEARCH TECHNIQUES:</b> Foundation and history of AI; data, information and knowledge; AI problems and techniques – AI programming languages, | 7     |

**Head Office:** P-2, Kh. No. 30, Saiduljaab, Near Saket Metro Station, M.B. Road, New Delhi-110030 | Ph.: 011-40719000

**Admnn. Office Vijaywada:** 1<sup>st</sup> Floor, Sai Odyssey, Opp. Executive Club, Gurunanak Nagar Road, NH-5, Vijaywada-520008

[www.lingayasgroup.org](http://www.lingayasgroup.org)

*"Par Excellence With Human Touch"*

|             |   |    |
|-------------|---|----|
|             | problem space representation with examples; blind search strategies, breadth first search, depth first search, heuristic search techniques: hill climbing: best first search, A * algorithm AO* algorithm, Minimax search procedure for Game Playing.   |    |
| II          | <b>KNOWLEDGE REPRESENTATION ISSUES AND TECHNIQUES:</b> Predicate logic; representing knowledge using rules. Semantic nets, partitioned nets, parallel implementation of semantic nets; frames, forward and backward chaining; frame based systems.<br><br>Reasoning under uncertainty, non-monotonic reasoning; Review of probability; Baye's probabilistic interferences and Dumpster Shafer theory; statistical reasoning, fuzzy reasoning. | 6  |
| III         | <b>ROBOTICS SYSTEM:</b> Introduction to robotics, Classification of Robots, Major components of robots, Robotics Applications, Artificial Intelligence in robotics, Basic components of a robot system, Functions of a robotic system, specification of a robotic system  | 5  |
| IV          | <b>MODELING AND END EFFECTORS:</b> Motion Conversion, Modeling of the mechanical System, Kinematics chain, Classification of end effectors-tools as end effectors-drive system for grippers, mechanical adhesive, vacuum magnetic, grippers, hooks and scoops, gripper force analysis, and gripper design, active and passive grippers  | 8  |
| V           | <b>ROBOT PROGRAMMING:</b> Software and hardware considerations, Introduction to robotic programming, Robotic extension of general purpose programming, Robot specific programming languages, VAL – basic commands, command based programming, sample programs.  | 7  |
| TOTAL HOURS |   | 33 |

|  |                           |                              |  |

| <b>Learner Centric Approach:</b>                 |                           |                              |  |
| <b>LC1: Assignment.</b>                          | <b>LC2: Mini project.</b> | <b>LC3: Quiz/Class test.</b> | <b>LC 4: Seminar on recent trends.</b> |
| <b>LC5: Group Task.</b>                          | <b>LC6: Others</b>        |                              |  |

## DETAILED SESSION PLAN

| Lecture session/<br>Number | Topics to be covered  | CO addressed | Teacher Centric Approach | Learner Centric Approach | References | Relevance with POs and PSOs |
|----------------------------|---|--------------|--------------------------|--------------------------|------------|-----------------------------|
| 1                          | Foundation and history of AI; data, information and knowledge                                     | 1            | TC1, TC2                 | LC1,LC2,LC3              | T1/T2/R1   | 2                           |
| 2                          | AI problems and techniques – AI programming languages, problem space representation with examples | 1            | TC1, TC2                 | LC1,LC2,LC3              | T1/T2/R1   | 3                           |
| 3                          | blind search strategies, breadth first search, depth first search                                 | 1            | TC1, TC2                 | LC1,LC2,LC3              | T1/T2/R1   | 3                           |
| 4                          | heuristic search techniques: hill   | 1            | TC1, TC2                 | LC1,LC2,LC3              | T1/T2/R1   | 2                           |

|    |   |   |          |             |          |   |
|----|---|---|----------|-------------|----------|---|
|    | climbing  |   |          |             |          |   |
| 5  | heuristic search techniques: best first search  | 1 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 6  | A * algorithm AO* algorithm   | 1 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 7  | Minimax search procedure for Game Playing   | 1 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 2 |
| 8  | KNOWLEDGE REPRESENTATION ISSUES AND TECHNIQUES: Predicate logic; representing knowledge using rules | 2 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 9  | Semantic nets, partitioned nets, parallel implementation of semantic nets                           | 2 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 10 | frames, forward and backward chaining; frame based systems  | 2 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 2 |
| 11 | Reasoning under uncertainty, non-monotonic reasoning  | 2 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 12 | Review of probability; Baye's probabilistic   | 2 | TC1, TC2 | LC3         | T1/T2/R1 | 2 |

|    |  |   |          |             |          |   |
|----|--|---|----------|-------------|----------|---|
|    | interferences and Dumpster Shafer theory   |   |          |             |          |   |
| 13 | statistical reasoning, fuzzy reasoning   | 2 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 14 | ROBOTICS SYSTEM Introduction to robotics,  | 3 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 3 |
| 15 | Classification of Robots   | 3 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 2 |
| 16 | Major components of robots, Robotics Applications  | 3 | TC1, TC2 | LC1,LC2,LC3 | T1/T2/R1 | 2 |
| 17 | Artificial Intelligence in robotics, Basic components of a robot system                            | 3 | TC1, TC2 | LC3         | R1/R2/R3 | 2 |
| 18 | Functions of a robotic system, specification of a robotic system                                   | 3 | TC1, TC2 | LC1,LC2,LC3 | R1/R2/R3 | 3 |
| 19 | MODELING AND END EFFECTORS Motion Conversion, Modeling of the mechanical System                    | 4 | TC1, TC2 | LC1,LC2,LC3 | R1/R2/R3 | 2 |
| 20 | Kinematics chain, Classification of end effectors-tools as end effectors-drive system for grippers | 4 | TC1, TC2 | LC1,LC2,LC3 | R1/R2/R3 | 3 |

|    |  |   |          |                 |          |   |
|----|--|---|----------|-----------------|----------|---|
| 21 | mechanical adhesive, vacuum magnetic                   | 4 | TC1, TC2 | LC1,LC2,LC3,LC4 | R1/R2/R3 | 2 |
| 22 | grippers   | 4 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 3 |
| 23 | hooks and scoops                                       | 4 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 2 |
| 24 | gripper force analysis                                 | 4 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 3 |
| 25 | gripper design   | 4 | TC1, TC2 | LC3             | R1/R2/R3 | 2 |
| 26 | active and passive grippers                            | 4 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 2 |
| 27 | ROBOT PROGRAMMING Software and hardware considerations | 5 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 3 |
| 28 | Introduction to robotic programming                    | 5 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 3 |
| 29 | Robotic extension of general purpose programming       | 5 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 2 |
| 30 | Robot specific programming languages                   | 5 | TC1, TC2 | LC1,LC2,LC3,LC4 | R1/R2/R3 | 3 |
| 31 | VAL - basic commands                                   | 5 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 2 |
| 32 | command based programming                              | 5 | TC1, TC2 | LC1,LC2,LC3     | R1/R2/R3 | 2 |
| 33 | sample programs  | 5 | TC1, TC2 | LC1,LC2,LC3     | T1/T2/R1 | 2 |

|    |      |  |          |     |          |   |
|----|------|--|----------|-----|----------|---|
| 34 | Quiz |  | TC1, TC2 | LC3 | T1/T2/R1 | 3 |
|----|------|--|----------|-----|----------|---|

### COURSE PRE-REQUISITES: Data Structure, Electronics and Mechanics Concepts

| C.CODE  | COURSE NAME                        | DESCRIPTION  | SEM |
|---------|------------------------------------|--|-----|
| MCA-128 | Artificial Intelligence & Robotics | This course explores AI fundamentals, machine learning, robotics development, and ethical considerations, preparing students for cutting-edge technology applications. | II  |

### COURSE OBJECTIVES:

|   |  |
|---|--|
| 1 | To introduce foundational knowledge about robotics and application of robotics   |
| 2 | To make the students familiar with concepts of Artificial Intelligence and reasoning.  |
| 3 | To discuss the implementation of robots  |
| 4 | To provide students with a solid foundation in the core principles, algorithms, and techniques of artificial intelligence, including machine learning, natural language processing, and computer vision. |
| 5 | To equip students with the practical skills necessary for designing, building, and programming robotic systems.  |

### COURSE OUTCOMES:

| S.NO | DESCRIPTION  | PO(1..12)<br>MAPPING | PSO(1..3)<br>MAPPING |
|------|--|----------------------|----------------------|
| CO1  | Demonstrate fundamental understanding of artificial intelligence (AI) and expert | PO1, PO2,            | PSO1                 |

|   |  |                    |            |
|---|--|--------------------|------------|
|   | systems. Solve basic AI based problems   | PO5, PO9           |            |
| CO2                                       | Define the concept of Artificial Intelligence and Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning. | PO3, PO4, PO5, PO6 | PSO3       |
| CO3                                       | Understand the basic concepts of working of robot.   | PO3, PO4, PO5, PO6 | PSO3       |
| CO4                                       | Understand the various robot programming languages.  | PO10, PO11         | PSO2, PSO3 |
| CO5                                       | Use and apply techniques for robot programming.  | PO1, PO2, PO5, PO9 | PSO1       |
| <b>COURSE OVERALL PO/PSO MAPPING: 2/2</b> |  |                    |            |

**COURSE OUTCOMES VS POs MAPPING (DETAILED; HIGH:3; MEDIUM:2; LOW:1):**

| S.NO | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO1 | PO12 | PSO1 | PSO2 | PSO3 |

\* For Entire Course, PO & PSO Mapping

**POs & PSO REFERENCE:**

|      |  |     |   |      |   |
|------|--|-----|---|------|---|
| PO 1 | Apply the knowledge of mathematics, science, engineering and Application fundamentals, and an engineering and Application specialization to the solution of complex engineering problems.                | PO7 | Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. | PSO1 | To equip the students with theoretical and implementation knowledgebase in all the latest areas of Computer Science & Engineering for a successful career in software industries, pursuing higher studies, or entrepreneurial establishments. |
| PO 2 | Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. | PO8 | Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.  | PSO2 | To nurture the students with the critical thinking abilities for better decision making by offering them a socially acceptable solutions to real life problems through computing paradigm.  |
| PO 3 | Design solutions for complex engineering problems and design system components or processes  | PO9 | Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.   | PSO3 | To nurture the students with the comprehensive analytical and design abilities by offering them   |

|      |   |       |  |  |   |
|------|---|-------|--|--|---|
|      | that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.  |       |  |  | techno-commercially feasible solutions of real business problems through computing. |
| PO 4 | Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.                          | PO1 0 | Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |  |   |
| PO 5 | Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations. | PO1 1 | Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.  |  |   |
| PO 6 | Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.       | PO1 2 | Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.  |  |   |

## COs VS POs MAPPING JUSTIFICATION:

| S.NO | PO/PSO MAPPED | LEVEL OF MAPPING | JUSTIFICATION   |
|------|---------------|------------------|---|
| CO1  | 2/1           | 1                | It signifies that students will acquire fundamental knowledge in AI and robotics, laying the groundwork for advanced learning and specialization.   |
| CO2  | 3/3           | 2                | It aligns with the course's focus on developing analytical and problem-solving skills, essential for designing and implementing advanced AI and robotics solutions.   |
| CO3  | 3/3           | 2                | It delves into advanced software engineering practices, methodologies, and project management, equipping students for challenging real-world software development scenarios. ensures that students acquire advanced technical knowledge and practical skills, enabling them to design innovative AI and robotics solutions, contributing to technological advancements. |
| CO4  | 2/3           | 1                | It ensures students grasp fundamental AI and robotics principles, providing a comprehensive knowledge base for advanced studies and practical applications.   |
| CO5  | 2/1           | 2                | It ensures that students gain a strong foundational understanding of AI and robotics concepts, fostering their problem-solving abilities and practical skills.  |

## GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS, POs & PSO:

| SNO | DESCRIPTION  | PROPOSED ACTIONS   |
|-----|--|--|
| 1   | Lack of Hands-On Robotics Experience: The syllabus lacks sufficient hands-on experience in building and programming physical robots.               | Introduce dedicated lab sessions where students work on robotics projects, building and programming robots to apply AI concepts practically. |
| 2   | Limited Exposure to Real-World Data: The course primarily focuses on theoretical AI concepts, but lacks exposure to real-world data and scenarios. | Incorporate case studies and projects that involve real-world datasets, enabling students to address practical AI challenges.                |
| 3   | Ethical and Responsible AI Emphasis: The syllabus may not adequately emphasize ethical and responsible AI practices.                               | Integrate ethics modules into the curriculum, discussing the societal impact of AI and robotics, and promoting responsible AI development.   |
| 4   | Industry-Relevant Tools and Technologies: The course may not cover the latest industry-standard AI and robotics tools and technologies.            | Update the syllabus to include training on cutting-edge AI and robotics tools and platforms used in the industry.                            |
| 5   | Limited Interdisciplinary Collaboration: The curriculum may not encourage interdisciplinary collaboration with other fields                        | Foster collaboration by  |

|  |  |   |
|--|--|---|
|  |  | introducing joint projects or courses with related disciplines, reflecting real-world multidisciplinary AI and robotics applications. |
|--|--|---|

*PROPOSED ACTIONS: TOPICS BEYOND SYLLABUS/ASSIGNMENT/INDUSTRY VISIT/GUEST LECTURER/NPTEL ETC*

## # TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

|   |  |
|---|--|
| 1 | Reinforcement Learning and Autonomous Systems Design |
| 2 | Deep Reinforcement Learning for Robotics             |
| 3 | Bio-Inspired Robotics:                               |
| 4 | Human-Robot Interaction and Collaboration            |
| 5 | AI in Healthcare Robotics                            |
| 6 | Robotic Perception and Computer Vision               |
| 7 | AI Ethics and Responsible Robotics                   |

## DELIVERY/INSTRUCTIONAL METHODOLOGIES:

|   |   |   |                                       |
|---|---|---|---------------------------------------|
| <input type="checkbox"/> CHALK & TALK     | <input type="checkbox"/> STUD. ASSIGNMENT | <input type="checkbox"/> WEB RESOURCES  | <input type="checkbox"/> NPTEL/OTHERS |
| <input type="checkbox"/> LCD/SMART BOARDS | <input type="checkbox"/> STUD. SEMINARS   | <input type="checkbox"/> ADD-ON COURSES | <input type="checkbox"/> WEBNIARS     |

## ASSESSMENT METHODOLOGIES-DIRECT

|  |   |  |  |
|--|---|--|--|
| <input type="checkbox"/> ASSIGNMENTS         | <input type="checkbox"/> STUD. SEMINARS | <input type="checkbox"/> TESTS/MODEL EXAMS   | <input type="checkbox"/> UNIV. EXAMINATION |
| <input type="checkbox"/> STUD. LAB PRACTICES | <input type="checkbox"/> STUD. VIVA     | <input type="checkbox"/> MINI/MAJOR PROJECTS | <input type="checkbox"/> CERTIFICATIONS    |
| <input type="checkbox"/> ADD-ON COURSES      | <input type="checkbox"/> OTHERS         |  |  |

## ASSESSMENT METHODOLOGIES-INDIRECT

|  |  |
|--|--|
| <input type="checkbox"/> ASSESSMENT OF COURSE OUTCOMES (BY FEEDBACK, ONCE) | <input type="checkbox"/> STUDENT FEEDBACK ON FACULTY (TWICE) |
| <input type="checkbox"/> ASSESSMENT OF MINI/MAJOR PROJECTS BY EXT. EXPERTS | <input type="checkbox"/> OTHERS                              |

## # INNOVATIONS IN TEACHING/LEARNING/EVALUATION PROCESSES:

1. Partner with industry organizations to provide real-world projects as part of the course. Students work on industry-relevant challenges, gaining practical experience and networking opportunities.
2. Implement a flipped classroom approach where lectures are delivered online, and in-class time is dedicated to hands-on lab work. Maximizes hands-on learning, encourages self-paced study, and provides flexibility for students.
3. Implement AI-driven chatbots that provide personalized learning recommendations, answer queries, and track student progress. Enhances student engagement, offers immediate support, and tailors learning to individual needs.
4. Integrate VR and robotics simulations to allow students to experiment with robots and AI algorithms in a virtual environment. Provides a safe and cost-effective way to experiment with robotics concepts and algorithms.

# Lingaya's Vidyapeeth

Deemed-to-be-University u/s 3 of UGC Act 1956, Government of India

**NAAC ACCREDITED**

Approved by MHRD / AICTE / PCI / BCI / COA / NCTE

Nachauli, Jasana Road, Faridabad- 121002 (Haryana)

Website: [www.lingayasvidyapeeth.edu.in](http://www.lingayasvidyapeeth.edu.in) | Ph: 0129-2598200-05

5. Shift from traditional exams to competency-based assessments, where students demonstrate their skills through practical projects and presentations. Focuses on applied skills, fosters critical thinking, and prepares students for real-world challenges.

**Prepared by**  
**Dr. Tapsi Nagpal**

**Approved by**  
**A. Dean & HOD**

*# Additionally, the details to be compiled separately by the Departmental Coordinator for the entire Department.*
